RE: Monthly Status Report, January 2013, Charlie Burch Site, Spring, Texas. VCP No. 421.

Activities Completed During January 2013

- ***Groundwater Pump-and-Treat System in Source Area:*** The bi-weekly system inspections were conducted on 11 and 25 January 2013. Water level elevations were collected in source area monitoring wells to provide additional input for continuing groundwater modeling efforts and evaluation of recovery well capture zones. A monthly operation and maintenance inspection was conducted on 25 January 2013. The inspection confirmed all operations were normal.

- ***Groundwater Pump-and-Treat System on the 13-Acre Tract:*** A monthly operation and maintenance site inspection was performed on 7 January 2013. The inspection confirmed all operations were normal. Two (of the three) carbon vessels were changed out on 25 January 2013. Damage to one of the two vessels was noted after the change out. Repair or replacement of the vessel is being evaluated. The Underground Injection Control Authorization Report for the period 1 June to 30 November 2012 was submitted to the TCEQ on 29 January 2013.

- ***Plume Remediation Activities:*** Continued discussions with Warren Wert to obtain property access for implementing Enhanced Anaerobic Bioremediation (EAB) on his property.

- ***Comprehensive Groundwater Monitoring:*** Continued evaluating groundwater data from the October 2012 annual groundwater sampling event. During the week of 7 January 2013, plugged and abandoned 16 select injection, monitoring, and recovery wells in accordance with Title 12 Chapter 1901.255 of the Texas Occupational Code and 16 TAC 76.1004. State of Texas Plugging Reports were submitted on 30 January 2013 (see attached reports).

- ***Miscellaneous:*** Continued correspondence with the Source Area landowner's (XOG's) attorney regarding the need to place documentation in the deed records under 30 TAC 350.13(h).

- ***Public Communications and Information Website:*** The project website (see below for link) has continued to be updated with the monthly progress reports and other relevant correspondence with TCEQ.

  Link to website: http://charlieburchproject.com/

Activities Planned for February 2013

The following activities are planned during the next reporting period:

- ***Groundwater Pump-and-Treat System in Source Area:*** The groundwater recovery system will continue to operate as planned, and the system inspection and effluent sampling will be performed on a bi-weekly basis.

- ***Groundwater Pump-and-Treat System on the 13-Acre Tract:*** The system will continue to operate as planned, and routine maintenance activities during the monthly site inspection will be performed. Repair or replacement of one of the three carbon vessels will continue to be evaluated.

- ***Plume Remediation Activities:*** Continue discussions on an access agreement and remediation alternatives for the portion of the plume underlying the Wert property with the property owner.

- ***Comprehensive Groundwater Monitoring:*** Submit the annual comprehensive groundwater monitoring report to the TCEQ by 28 February 2013. The report will document the October 2012 groundwater monitoring event and annual performance of the source area and 13-acre tract pump-and-treat systems.

- ***Public Communications and Information Website:*** The information on the project website will continue to be updated and maintained to keep the most recent information submitted to TCEQ.
